Organisatie registreren

Dit hoofdstuk bevat instructies voor het registreren van een nieuw account en een nieuwe organisatie op Buildbase.

Navigeren naar de registratiepagina

1. Ga direct naar <https://backoffice.buildbase.be/payment>.
2. Of ga naar <https://backoffice.buildbase.be>. Klik onderaan de pagina op [Registreer](#). U wordt doorverwezen naar <https://backoffice.buildbase.be/payment>.

Loginpagina met registreren link aangeduid

Account aanmaken

Vul hier uw gegevens in en ga akkoord met de algemene voorwaarden nadat u deze gelezen heeft.

U heeft de keuze tussen twee accounttypes:

1. Gratis proefversie

Accounttype gratis proefversie

Gratis proefversie

Bij een gratis proefversie zal u gedurende **twee weken** kennis kunnen maken met Buildbase. Hiervoor hoeft u verder geen gegevens in te vullen.

1. U kan dus onmiddellijk een proefperiode starten door op **START** + **15** + **DAGEN** + **GRATIS** te klikken.

Welkom bij **buildbase**

Fijn dat je interesse hebt in een gratis trial van onze ERP-modules voor de bouwsector. Ontdek hoe je als bouwbedrijf je administratie vereenvoudigt met Buildbase gaande van projectbeheer tot personeelsadministratie. Vul onderstaand je gegevens in en probeer onze applicatie gratis gedurende 30 dagen!

Aantal gebruikers en maanden

Vanzelfsprekend moet uw abonnement gelden voor minstens één gebruiker en minstens één maand. Wanneer u al een account heeft, moet u minstens het aantal actieve gebruikers ingeven. Dit aantal wordt dan ook automatisch voor u ingevuld. U kan er wel nog voor kiezen om dit te verhogen.

Prijsberekening

De prijsberekening gebeurt automatisch wanneer alle velden zijn ingevuld, zodat u makkelijk kunt zien hoeveel u betaald.

Tijd registreren

Dit hoofdstuk bevat instructies voor het toevoegen van een tijdregistratie.

In- en uitklokken

Introduction

Buildbase was created by Strouwi BV as a mobile application for construction companies which is usable by employees on their mobile devices. The goal of this application is for employees to register worked hours daily, for specific clients and projects ([Clients and projects](#)).

The managers from construction companies who use buildbase will be able to consult these hours based on some parameters via file export ("[Consult employee hours](#)" in "[Employee hours](#)").

The current plan is to build a custom frontend as a progressive web application. This means it will be accessible everywhere with the only prerequisites being access to internet and a browser. The language used will be Vue.js.

As backend, we opted for the Java Spring-netflix cloud architecture. This means a microservice framework will be used to handle default components like authentication, authorization, ... while the specific requirements will be created in a standalone microservice component. All components will be connected using this framework.

General

On every page there will be a template header which contains the buildbase logo.

Logo

Registration

Login page

Here you can log in with the Email and password linked to your account. If your boss didn't give you a password check your mail inbox for a mail to setup a password or ask your boss what password he set up for your account.

If you are the owner of the company and want to register your company you can press the registration button at the bottom and follow the steps listed in "Trial registration" or "Paid registration".

Login-page

Trial registration

At the login page press "registreer" to register a new company. This will lead you to the account information page. Fill in the information and choose the option "Gratis proefversie" for a 30 days free trial.

After reading the terms of conditions you accept them and press the "Start 30 dagen gratis" button, this will lead you to the dashboard where you can check out and test all the functions of the application.

The image displays two screenshots of the Buildbase registration process. The left screenshot shows the login page with fields for email and password, and a 'START 30 DAGEN GRATIS' button. The right screenshot shows the account information page with fields for company name, BTW number, first name, last name, email, phone, password, and account type (Gratis proefversie or Abonnement). A hand cursor is shown clicking the 'START 30 DAGEN GRATIS' button in both screenshots.

Trial-registration

Paid registration

At the login page press "registreer" to register a new company. This will lead you to the account information page. Fill in the information and choose the option "Abonnement" to start a subscription.

After reading the terms of conditions you accept them and press the "Volgende" button, this will lead you to the next step.

The next step is to add the company address, fill in the full company address and click on "volgende" to continue. If you want to go back you can press "vorige".

When you continued you can now see what is included in the standard package, you here have to specify the amount of users u want (u can always add more at any moment) and for how long you want to subscribe.

After filling in this info you will see the total cost, and you can press "volgende" to continue and "vorige" to go back.

This will lead you to the last step, this is where you select which payment method you want to use. This will bring you to the payment page of you chosen payment method. After the payment is successfully done you will see the page where it says your payment succeeded and you can choose to go to the home page or to the settings.

If you payment did not go successful you will get to see a screen where it says the payment was cancelled and asks if you want to try again with a "klik hier" to go back to the registration page and try again to register the company.

INLOGGEN

Login Page

"Email" will be set when administrators of the buildbase application create a new user. This email will act as authentication and authorization for the person to log into the system. The combination of email and password will be handed to the employee in person by the administrators.

The password will also be set by buildbase admins when they are creating a new user. This password can only be changed by the administrators.

There will be an option to remember the user. This will make sure the user can open the application without the need to login again every time.

Homepage

On every secured page the first- and lastname of the currently logged-in user will be clearly visible in the top right corner of the screen. These are the first- and lastname linked to the email when the account was created by buildbase administrators.

There are 2 general options in this main screen: calendar and counters.

Calendar

MON	TUE	WED	THU	FRI	SAT	SUN
Aug 1	2	3	4	5	6	7
8	9	10	11	12	13	14
15	16	17	18	19	20	21
22	23	24	25	26	27	28
29	30	31	Sep 1	2	3	4

Calendar

This is a simple clickable calendar. You can see all days of the current month. The days of the weekend (saturday and sunday) are displayed in grey. All days will be color coded. These color codes represent what activity has been registered for that day. When clicking a specific day you'll see its details and will be able to register worked time or absences.

Counters

The activities will be visualised in a donut-chart by color code. This donut-chart will display all the hours registered for the selected month in the calendar. It will also display the theoretical hours which need to be worked that month, based on the current users statute.

Admin console

Teams

Teams overview

Manage teams

If the admin has chosen the option "teams" in the settings it is possible to create teams. By selecting the option "Teambeheer" in the admin console the list of teams becomes

visible. Here the admin will have the option to create new team, set the existing teams to active/inactive or delete a team. You can also modify this team. After setting a team in the list to inactive, the slider will change to give a visual indication of the changed team state. If you select a team you will see this teams details, and you can add and delete:

- Leaders
- Members

Additionally, the admin can connect clients and projects to a team to all clients and projects and set each client and project inactive for a team.

Create a new team

Team create add button highlighted

Team create save button highlighted

Team create error message highlighted

The admin will be able to create a team. He can do this from the teams page by clicking on "New Team". He will be able to provide a team name which is mandatory to fill out. When entering a new team's name, the system will also check the existing list of teams to find a match, to prevent double entries. An error message will be shown when the name is already in use. After pressing the save button, a new team is created and the application will navigate to the created team detail page.

Modify a team

Modify a team

To modify a team the admin can select it in the team overview. On the 'modify team' page it is possible to change the:

- name of the team

Delete a team

By selecting the bin symbol behind a team a confirmation dialogue will appear to confirm the deletion of the selected team. By confirming the team will be removed from the list. If there is at least one work-clocking on a team the team will be archived. If there are no work-clockings the team will be permanently removed.

Team leaders and members

By selecting a team a new page will open with a list of leaders and members for the selected team. Here you can add and delete leaders and members. If there are no leaders and/or members in the team only the titles will be visible. A user can either be a leader for the team or a member but not both. Users can be assigned to different teams as leaders or members. The users can be set to inactive within a team with the slider behind their name. After setting a leader or a member in the list to inactive, the slider will change to give a visual indication of the changed state for that leader or user.

Adding team leaders

Adding team leaders

Using the add leaders button will open a selection dialog where you can select a user as leader for the team. You can add multiple, unique users as leader for the team.

Removing team leaders

By selecting the bin symbol behind a leader of the team, this user will be removed from the list of the selected team. The user can be restored as leader by the adding leaders to the team option.

Adding members to a team

Adding team members

Using the add members button will open a selection dialog where you can select a user as member for the team. You can add multiple, unique users as member for the team.

Removing members from a team

By selecting the bin symbol behind a member of the team, this user will be removed from the list of the selected team. The user can be restored as member by the adding members to the team option.

Clockings team members

When a user has the role of team leader he can add clockings for the team members. After logging in the team leader can select 'Team Leden' from the menu.

See team members

This will open a list of users of the teams in which the user is set as team leader. By clicking on one of the users the calendar of that user opens.

Select calendar team member

Calendar team member

Now the team leader can add work clockings and/or absences for the team member see Calendar.

Clients and projects in a team

Adding clients and projects to a team

Adding clients to a team

In the detail screen of a team the admin can connect the team to clients and projects. When clicking the button the list of clients will appear. By setting a client inactive all clients and users will be connected to the team. This works only for a client without active projects. When all clients have active projects just open the projects of that client by

clicking on the client name. Set one of the projects to inactive. This also connects all clients and projects to the team.

Setting clients and projects inactive

In the detail screen of a team select the list of clients. With the slider behind the client you can set that client to inactive (or active). A client can only be set to inactive if there are no more active projects for that client. By selecting the client an overview page with the list of projects will become visible. Here you can use the sliders behind the projects to set them to inactive. After setting a client or project to inactive the slider will change to give a visual indication of the changed state for that leader or user.

Users

User overview

The screenshot displays the 'Werknemers' (Employees) section of a web application. The interface features a dark blue sidebar on the left with navigation links: PRIKONG, KALENDER, KLANTEN, PROJECTEN, RAPPORTEN, **WERKNEMERS** (highlighted), FACTURATIE, and INSTELLINGEN. The top header shows the user 'KYAN DECERF' with a profile icon 'KD'. The main content area is titled 'Werknemers' and includes a search bar labeled 'Zoeken', a filter icon, and a '+ ' button. Below this is a table with columns: Naam (Name), Email, Functie (Function), Teams, and Status. The table lists three employees: Jan Jansens (JJ), Kyan Decerf (KD), and test test (TT), all with a status of 'actief' (active). The bottom of the table indicates 'Totaal: 3/3'.

Naam	Email	Functie	Teams	Status
JJ Jan Jansens	jan.jansens@bib.com			actief
KD Kyan Decerf	kb@bib.com			actief
TT test test	test@bib.com			actief

Totaal: 3/3

User-overview

After selecting the option "Gebruikers" in the admin console, you will navigate to a page with a list of users. Here you will have the option to create new users or set existing users to active/inactive. If you select a user, you will see this user's details, and you can modify this user. After setting a user in the list to inactive, the slider will change to give a visual indication of the changed user state.

OPSLAAN

User create page with save button highlighted

When creating a new user, you will need to provide an email, firstname, lastname, workschedule, statute, role and (if desired) password for this user. An email will be send to this person, but the password will have to be communicated in person.

When creating a new user, you will need to provide an email, firstname, lastname, workschedule, statute, role and password (if desired) for this user. An email will be send to the user so they can set their own password. If the password was set for them, this will need to be communicated manually. After the user has been created, you will be directed to its details page.

Modify-user

To modify a user you can select it in the user overview. On the 'modify user' page, you will be able to change the:

- avatar
- firstname
- lastname
- email
- statute
- role
- work schedule
- password
- activity status

Change avatar

The admin will be able to change an employee's avatar.

Upload or change avatar

Change-avatar

On the 'modify user' page click anywhere in the avatar field. This will open the upload page for the users avatar. Use the select field to navigate to the desired avatar and click on the save button. The avatar will be shown and used on every page for the user. To change the avatar use the same method.

Delete avatar

Delete-avatar

On the 'modify avatar' page you can delete the avatar by clicking on delete. You will return to the 'modify user' page. In the whole application the custom avatar will be used for this user.

Change password

The admin will be able to change an employee's password should he have lost it. He will have to hand this new password over to the employee in person.

Project create error message highlighted

32%/>

The admin will be able to create projects for existing clients. He can do this from the projects page and select any of the available clients or do this from a client detail page where he can create a project with that client already selected as the linked client. He will be able to provide a project name, linked client, start date, end date and the distance of the project. The project name, linked client, start date and distance are all mandatory fields to fill out. End date is the only field that is not mandatory but when entering an end date it, can not be before the start date. When entering a new project's name, the system will also check the existing list of projects to find a match, to prevent double entries. An error message will be shown when the name is already in use. After pressing the save button, a new project is created and the application will navigate to the created projects detail page

Modify client or project

Clients

The admin can navigate towards the client ("KLANTEN") page. Here you will get an overview of all the clients you have created earlier. Here you want to click on the client name in the list. This will open up a new detail page that shows all data linked to that client.

The screenshot displays the 'Bouwen BV' client detail page. The left sidebar contains navigation links: PRUUKING, KALENDER, KLANTEN (highlighted), PROJECTEN, RAPPORTEN, WERKNEMERS, TEAMS, AFDELINGEN, and INSTELLINGEN. The top right shows the user 'Guido GUBBELS' with a profile icon. The main content area is divided into sections: 'Klant informatie' (Client information) with fields for Start datum (2023/06/04), Eind datum (2023/06/05), Adres (Tramazantlei 44, 2900 Schoten Antwerpen, België), and Afstand in km (1); a map of the location; 'Contact informatie' (Contact information) with fields for Naam (Jos Verachtert), Telefoon, Email (jos.verachtert@gmail.com), and Functie (Eigenaar); and 'Projecten' (Projects) with a search bar and a table showing one project: 'Bouwen BV' with status 'actief'. A 'Nieuw project' button is visible in the top right of the projects section.

Client-detail

Change clientname

The admin can change the clients name by clicking the pencil icon next to the client name.

Change-client-name

After changing the name you can click the "OPSLAAN" button to navigate back to the detail page of the client. If you make no changes you can navigate back to the detail page of the client by clicking on "Terug naar ..." under the title.

Change-client-name

Deactivate or delete client

Deactivate client

The admin can also deactivate the client by clicking the "Acties" button and clicking on "Zet op inactief". Like deactivating a client you can also activate them again doing the exact

same proces as deactivating but clicking "Zet op actief". Deactivating a client will also deactivate all projects linked to that client.

Change-client-status

Delete client

The admin can delete a client and all his projects by clicking the "Acties" button and clicking on "Verwijder". If there are no clockings the client and all his projects will be removed . If there are clockings for this client and at least one project it will archive the client.

Change client information

By clicking on the pencil in the title of "Klant informatie" you will open the detail page for the information of the client.

Change-client-information

In the client information detail page you can change one or all the information fields. After modifying the information you click on the "OPSLAAN" button and return to the client page. If you make no changes you can navigate back to the detail page of the client by clicking on "Terug naar ..." under the title.

Change-client-information-details

Change client contact information

By clicking on the pencil in the title of "Contact informatie" you will open the detail page

for the contact information of the client.

The screenshot shows a web application interface for managing clients. The left sidebar contains navigation links: PRIJONG, KALENDER, KLANTEN (highlighted), PROJECTEN, RAPPORTEN, WERKNEMERS, TEAMS, AFDELINGEN, and INSTELLINGEN. The main content area is titled 'Bouwen BV' and includes a profile picture placeholder. Below the title, there are two main sections: 'Klant informatie' and 'Contact informatie'. The 'Klant informatie' section displays 'Start datum: 2023/06/04', 'Eind datum: 2023/06/05', 'Adres: Tramazantlei 44, 2900 Shoten Antwerpen, België', and a map. The 'Contact informatie' section shows 'Naam: Jos Verachttert', 'Email: jos.verachttert@gmail.com', and 'Functie: Eigenaar'. A hand icon points to the 'Acties' button in the top right corner of the 'Contact informatie' section. Below these sections is a 'Projecten' table with a search bar and a 'Filter' button. The table has columns for 'Naam' and 'Status', and it lists 'Bouwen BV' with a status of 'actief'. A 'Nieuw project' button is also visible.

Change-client-contact-information

In the client contact information detail page you can change one or all the information fields. After modifying the information you click on the "OPSLAAN" button and return to the client page. If you make no changes you can navigate back to the detail page of the client by clicking on "Terug naar ..." under the title.

The screenshot shows the 'Bewerk klant informatie' (Edit client information) form. The form is titled 'Bewerk klant informatie' and includes a back link 'Terug naar Bouwen BV'. The form contains several input fields: 'Start datum' (2023/06/04), 'Eind datum' (2023/06/05), 'Afstand in km' (1), 'Adres' (Tramazantlei 44, 2900 Shoten Antwerpen, België), 'Wijknummer' (44), 'Postcode' (2900), 'Stad' (Shoten), 'Provincie' (Antwerpen), and 'Land' (België). A blue 'OPSLAAN' button is located at the bottom right of the form.

Change-client-contact-information-details

Adding a project to the client

By clicking on the "+ Nieuw project" the admin can add a new project for the client.

The screenshot shows a web application interface for managing clients and projects. The left sidebar contains navigation links: PRIOKING, KALENDER, KLANTEN (highlighted), PROJECTEN, RAPPORTEN, WERKNEMERS, TEAMS, AFDELINGEN, and INSTELLINGEN. The main content area is for the client 'Bouwen BV'. It includes a profile picture, a 'Terug naar klanten' link, and buttons for 'Activeer klant' and 'Acties'. The 'Klant informatie' section displays start and end dates (2023/06/04 to 2023/06/05), an address (Tramazantlei 44, 2900 Schoten Antwerpen, Belgium), and a map. The 'Contact informatie' section shows the name (Jos Verachtert), email (jos.verachttert@gmail.com), and function (Eigenaar). Below these is a 'Projecten' section with a search bar and a table. The table has columns for 'Naam' and 'Status'. One project is listed: 'Bouwen BV' with status 'actief'. A '+ Nieuw project' button is visible in the top right of the projects section, with a hand cursor pointing to it.

Client-add-project

The admin will be able to create projects for existing or new clients. He will be able to provide a project name and the distance of the project. In addition, the admin has to enter a start date. The end date is not necessary but if used it can not be before the start date. After entering the necessary fields you can click on the "OPSLAAN" button. You return to the client page and the new project is visible in the list of projects from the client.

The screenshot shows a modal window titled 'Project toevoegen' for the client 'Bouwen BV'. The form contains the following fields: 'Project *' (text input), 'Afstand * km' (text input with a unit label), 'Start datum *' (calendar icon and date '2023/11/06'), and 'Eind datum' (calendar icon and empty date field). An 'OPSLAAN' button is located at the bottom right of the form.

Client-add-project-detail

Projects

By clicking in the row of one of the projects in the list on the client detail page the admin navigates to a new detail page that shows all data linked to that project.

Client-open-project

In the projects detailpage the admin can see and change all the information concerning the project.

Update-project

By clicking on the name of the client the admin will navigate back to the client detailpage.

Update-project_navigate_to_linked_client

Change project name

By clicking on the pencil next to the project name a new detail page opens.

Update-project-name

After changing the name you can click the "OPSLAAN" button to navigate back to the detail page of the project. If you make no changes you can navigate back to the detail page of the project by clicking on "Terug naar ..." under the title.

Update-project-name-detail

Change client for project

The admin can change the client for the project by clicking on the pencil next to the client name.

Update-project-linked-client

The admin can choose the name of the client from the dropdown list which contains the available clients. After changing the client you can click the "OPSLAAN" button to navigate back to the detail page of the project. If you make no changes you can navigate back to the detail page of the project by clicking on "Terug naar ..." under the title.

Update-project-client

Change project information

By clicking on the pencil in the title of "Project informatie" you will open the detail page for the information of the project.

Update-project-info

In the project information detail page you can change one or all the information fields. After modifying the information you click on the "OPSLAAN" button and return to the project page. If you make no changes you can navigate back to the detail page of the project by clicking on "Terug naar ..." under the title.

Change project contact information

By clicking on the pencil in the title of "Contact informatie" you will open the detail page containing the contact information of the project.

The screenshot shows a web application interface. On the left is a dark blue sidebar with a logo 'b' and a list of menu items: PRKING, KALENDER, KLANTEN, PROJECTEN (highlighted in green), RAPPORTEN, WERKNEMERS, AFDELINGEN, and INSTELLINGEN. At the bottom of the sidebar is the text '© 2019 - 2021'. The main content area has a white header with a back arrow and the text 'Terug naar Bouwen project 1'. Below this is the title 'Bewerk contact informatie'. The form contains three input fields: 'Voornaam' with the value 'Jan', 'Achternaam' with the value 'Peters', and 'Email' with the value 'Janpeters@gmail.com'. There is also a 'Telefoon' label and a 'Functie' label with the value 'Eigenaar'. A blue button labeled 'OPSLAAN' is in the bottom right corner of the form. The user's name 'JAN PETERS' and a green profile icon with 'JP' are in the top right corner.

Update-project-contact

In the project contact information detail page you can change one or all the information fields. After modifying the information you click on the "OPSLAAN" button and return to the project page. If you make no changes you can navigate back to the detail page of the project by clicking on "Terug naar ..." under the title.

Project foto's

Update-project-pictures

In the detail page for the pictures the admin can upload, download and delete pictures

Update-project-pictures-details

Deleting client and project

The admin will be able to delete existing clients and projects. Only clients and or projects with no logged working hours can be deleted. If there are logged working hours the client and or project will be archived for future purposes.

Deleting client

When deleting a client a popup will ask you to confirm that you want to delete the client. After confirming this the client will no longer be visible in the list. Only clients with no logged working hours will be completely removed. If a client has logged working hours the client will be kept in the archive.

Deleting project

When deleting a project a popup will ask you to confirm that you want to delete the project. After confirming this the project will no longer be visible in the list. If the project had no logged working hours it is completely removed. In case there are logged working hours the project will be kept in the archive.

Merge existing projects (Optional: not in project scope)

In the event of a double entry for the same project, the admin will be able to merge these entries to make sure all the worked hours for these entries are properly linked to one

project.

Consult hours

On the consult hours page the admin can consult hours for a given period of time. When choosing the option 'show inactive options' the inactive employees, clients and projects will be visible in the dropdown menu's. These will have no effect on the generated data.

Consult hours of employees

The admin can consult the employees hours for a given period of time.

Consult hours employees

In the consult hours view the admin can select a specific employee or all employees. He can select the current month or choose a specific start date and end date. When choosing 'show data' a table is generated with the clockings for the selected values. When choosing 'export data' a file with this data is generated.

Consult hours of clients and projects

When the module client and project management is installed the admin can consult hours for an employee and for clients and projects. For consulting hours of employees see Consult-hours-of-employees

Consult hours clients

By selecting the option clients the admin can generate reports for clients. In the consult hours view the admin can select a specific client or all clients. When a specific client is chosen the admin can now select a specific project or all the projects from that client. The admin can select the current month or choose a specific start date and end date. When choosing 'show data' a table is generated with the clockings for the selected values. When choosing 'export data' a file with this data is generated.

Register-employee-absence

Settings

The admin can adjust some parameters of the app by choosing "instellingen" in the admin-console. Here he can change the settings of:

- Maximum days an employee can register a work clocking in the past
- Enable or disable teams
- Maximum days an employee can register an absence in the past

Clocking in the past

Clockings in the past

By selecting "MaxDaysClockingInThePast" the admin is able to enter a number of days that an employee is allowed to register a work clocking before the current date. Standard the amount is set to 10 days. If set to zero the employees can only register a work clocking on the current date. The settings do not limit the ability of the admin to enter or adjust a work clocking on a previous date.

Enable teams

Enable teams

By selecting "EnableTeamsOption" the admin is able to activate or de-activate the use of teams. When set to true the admin can manage teams. If set to false the option "teambeheer" will be removed from the admin-console. If the admin has created one (or more teams) and then disables the option the details of the team will be hidden but not deleted. If the admin later decides to enable the teams option the team (or teams) will be visible again in the list of teams.

Absences in the past

Absences in the past

By selecting "MaxDaysAbsenceInThePast" the admin is able to enter a number of days that an employee is allowed to register an absence before the current date. Standard the amount is set to 10 days. If set to zero the employees can only register an absence on the

current date. The settings do not limit the ability of the admin to enter or adjust an absence on a previous date.

Configuration

Activities

Register time

Register-time

Klant & project database When selecting a specific day on the calendar you will be guided to the page where you'll be able to register worked time for that specific day. On the page the expected work hours for that day for the user are shown, the amount depends on the statute of the user and the selected day. When a registration is made the total registered time will also be shown and if a break has been registered. When adding worked hours the start time for the new time registration will be set to the end time of the previous registration. It is possible to edit previously registered worked time only for the amount of days that are set in the apps settings. It's only possible to add a new clocking according the amount of days that are set in the apps settings. If mistakes were made an employee has to ask an admin to change registered hours of days further in the past.

Register-second-time

Adept-registered-time-step1

Register time for a client and a project

Register-time

When selecting a specific day on the calendar you will be guided to the page where you'll be able to register worked time per client and project for that specific day. On the page the expected work hours for that day for the user are shown, the amount depends on the statute of the user and the selected day. When a registration is made the total registered time will also be shown and if a break has been registered. When adding worked hours the start time for the new time registration will be set to the end time of the previous registration. When adding worked hours an employee has to choose a client out of a list of active clients and a project out of a list of active projects. It is possible to edit previously registered worked time only for the amount of days that are set in the apps settings. It's only possible to add a new clocking according the amount of days that are set in the apps settings. If mistakes were made an employee has to ask an admin to change registered hours of days further in the past.

Absence

Register-absence

Absences can only be added for the current, for future days or for the amount of previous days that the admin has set in the apps settings. An employee will not be able to change absences of days further in the past. They will need to ask an admin to change the absences

You can choose between 4 different absences:

- Legal holiday
- Absence
- Bank holiday
- Other

When selecting other, a text field will become available to explain the reason of absence.

Absences longer then one day

After choosing an absence a datepicker will become available. The user can optionally select a future end date for the absence. When committed the absences are only shown on working days, days when work hours are expected.

When choosing a day in the past a message pops up. The user can then choose a new and valid date or add an absence only for the selected day

Prickings

Prickings can be accessed through the navigation bar on the left of the screen. The button will always display a clock symbol, but its text may vary.

Alt text

When there is no ongoing pricking, the button will show the word "Pricking".

Alt text

When there is an ongoing pricking, the button will display the elapsed time since it started.

Alt text

When the elapsed time is more than 24 hours, "> 24 uur" will be displayed instead.

Start pricking

Alt text

On the pricking page, when there is no ongoing pricking, you will be able to start one. To start a pricking, all you need to do is press start.

Note: it is not possible to start a pricking when another clocking is registered in the future.

Stop pricking

The screenshot shows the 'Prikking' (Pricking) interface. On the left is a dark sidebar with a 'b' logo and navigation links: 'KALENDER', 'RAPPORTEN', 'WERKNEMERS', and 'INSTELLINGEN'. At the top of the sidebar is a timer showing '00:02:43'. The main content area has a title 'Prikking' and a link '< Terug naar 13/06/2024'. Below this, it shows 'Van * 03:16 PM' and 'Tot * 03:18 PM'. There is a large text box labeled 'Opmerking' for entering remarks. At the bottom of the main area, it says 'Minimaal 30 minuten werken om een pauze te nemen' and a blue 'STOP' button. The footer at the bottom left reads '© Struim EV 2019 - 2024'.

Alt text

On the pricking page, when there is an ongoing pricking, you will be able to stop it. On this page, you can enter a comment and select whether or not you took a break. (Just like with normal work clockings) Fields like start and end time , they are purely informational here.

When you press stop, if less than one minute has passed since the pricking started, the pricking will be cancelled. Otherwise the pricking will be converted to a work clocking, disregarding the seconds from the original pricking.

Note: the pricking start- and endtime are set in the backend. So there could be a slight delay between when the button is pressed and the registered time.

Start pricking for client

Alt text

On the pricking page, when there is no ongoing pricking, you will be able to start one. To start a pricking, all you need to do is select the client and project for which you want to start the pricking. Then press start.

Note: it is not possible to start a pricking when another clocking is registered in the future.

Stop pricking for client

Alt text

On the pricking page, when there is an ongoing pricking, you will be able to stop it. On this page, you can enter a comment and select whether or not you took a break. (Just like with normal work clockings) Fields like start and end time and client and project are not editable, they are purely informational here.

When you press stop, if less than one minute has passed since the pricking started, the pricking will be cancelled. Otherwise the pricking will be converted to a work clocking, disregarding the seconds from the original pricking.

Note: the pricking start- and endtime are set in the backend. So there could be a slight delay between when the button is pressed and the registered time.

Color codes

Registered activities will be visualised in the calendar by color code.

White

Nothing has been registered for this day, only for the present day or days in the future.

Green

If there are registered hours for that day, that day will be green in the calendar. This is only for the present day or days in the past.

Orange

If an absence has been registered for a day, this day will be orange in the calendar.

Red

When a day is in the past and no activities have been entered, that day will be red in the calendar.

Security

Calculation rules

The theoretical hours an employee needs to work will be calculated with the statute of the employee and the amount of workdays in a month. Every day an employee works is a 8h work day which totals in a 40h week. If an employee has a 38h statute, Fridays are 6h work days.

e.g.: In the images below you can see the calendar for June and Juli for two employees. Miguel has a 40h statute so every day is a 8h work day. This means that the theoretical hours he needs to work are calculated by multiplying all working days times eight.

Georges has a 38h statute so every day except Friday is a 8h work day, with Friday being a 6h work day. This means that the theoretical hours he needs to work are calculated by multiplying all working days except Fridays by eight plus all Fridays times six.

In June, this means Miguel has to work 22x8 hours, which is 176 hours and Georges has

to work $(18 \times 8 + 4 \times 6)h$, which is 168 hours.

Example_juni

In Juli, this means Miguel has to work 22×8 hours, which is 176 hours and Georges has to work $(17 \times 8 + 5 \times 6)h$, which is 166 hours.

Example_juli

Banner messages

Buildbase uses banners to notify the user of:

- information about the app
- success for operations
- errors that occurred

Information messages

Subscription status

Subscription Banner

When a subscription nears the end a banner will be shown on all views. The color and icon depend on the remaining time.

Appearance of the subscription banners:

- Time remaining less than 4 days: logo clock (filled) and red colored banner

 Uw abonnement verloopt over 3 dagen. [Verleng hier je licentie](#). Bij vragen contacteer info@buildbase.be of ga via ons [contactformulier](#).

Subscription Expires in less than 4 days

- Time remaining less than 8 days: logo clock (non-filled) and orange colored banner

 Uw abonnement verloopt over 6 dagen. [Verleng hier je licentie](#). Bij vragen contacteer info@buildbase.be of ga via ons [contactformulier](#).

Subscription Expires in less than 8 days

- Time remaining more than 14 days (only with trial subscription): logo info and blue colored banner

 Uw proefversie verloopt over 15 dagen. [Koop hier je licentie](#). Bij vragen contacteer info@buildbase.be of ga via ons [contactformulier](#).

Trial Subscription for more than 14 days remaining

Paid subscription

When the time is near to renew the subscription a banner is shown on top of all views of the app. The appearance of the banner depends on the remaining time of the current subscription. If the subscription is expired the admin can still log in. Except for the license settings all views are blocked until the subscription is renewed.

The screenshot shows the Buildbase app interface. At the top, a pink banner indicates the subscription has expired: "Uw abonnement is verlopen. [Verleng hier je licentie](#). Bij vragen contacteer info@buildbase.be of ga via ons [contactformulier](#)." Below the banner, the "Abonnement" (Subscription) settings page is displayed. The page shows the following details:

- Aantal gebruikers:** 3/3 – [Extra gebruikers toevoegen](#)
- Maandelijks kostprijs:** €17.91
- Modules:**
 - Personeelsadministratie
 - Tijdsregistratie
 - Facturatie
- Geldigheid (Validity):**
 - Start datum:** 17/06/2024
 - Eind datum:** 18/06/2024
 - Vandaag:** 19/06/2024
- [Vernieuw abonnement](#) (Renew subscription)

Subscription is expired

Trial subscription

When using a trial subscription a banner is shown on top of all views of the app. The appearance of the banner depends on the remaining time of the trial period. If the trial period has expired the admin can still log in. Except for the license settings all views are blocked until a paid subscription is made.

Subscription is expired
